PROJECTS

UniClub

[GitHub](#)

- UniClub is a club management web application basically designed to handle the working of the clubs of our College, which offers and controls a variety of club activities, including sharing event information, posting club-related information, assigning Presidents to every Club via Admin Panel.
- Group Project : As a Project Leader, designed the whole UI using Figma and then developed the whole Front-end from scratch using NextUI in React.
- Implemented Routes to navigate from one page to another.

Expense - Tracker

[GitHub](#)

- Created a fully responsive Expense and Income tracker website, where we will list all our income and expenditures from various sources like salary, freelance, food, travel, medical, education etc. to make an analysis about our money. So we can have an idea where we are spending our amount.
- Group Project : Lead the project and built the Front-end from scratch using React JS.
- Implemented Lottie animations on Authentication page.

TinDog

[GitHub](#)

- Created an interactive and fully responsive tinder like website made exclusively for Dogs.
- Implemented Bootstrap for the components like Carousel, Navbar, Buttons, Card, etc.
- Deployed the website on GitHub Pages.
